NO ONE DELIVERS MORE

MORE COMFORT.
MORE CONVENIENCE.
ALL WITH MORE PRODUCTIVITY
AND PERFORMANCE.

Get more of what you're looking for: THE BCS-9 FROM HYUNDAI

The highly versatile BCS-9 is ideal in applications ranging from warehouse/distribution centers to manufacturing facilities. It brings greater productivity to dock work, transporting loads, moving work in progress between manufacturing cells, and interfacing with racked areas. It offers a host of performance advantages. The controls are intuitive and allow for precise handling. There is greater visibility and a spacious operator compartment for maximum comfort and safe operation. Rugged and reliable, the AC-powered BCS-9 also includes an unsurpassed array of advanced features all designed to lower your costs as it raises your profits.

Check out all the advanced features the BCS-9 can bring your operation.

MULTIFUNCTION CLUSTER DELIVERS KEY INFORMATION

This advanced, LCD color monitor displays essential operational data in real time, including speed, accelerator level, steer angle, travel direction, battery discharge indicator, hour meter, working mode, and more. You'll find innovations everywhere:

- The load weight indicator displays the load weight and warns the operator if safe parameters are exceeded
- Self-diagnostic tools to keep the equipment safe
- High, Normal, Economy and Turtle operating modes

HIGH-PERFORMANCE LITHIUM-ION BATTERY

The optional Li-ion battery offers rapid charging in just 2 hours and opportunity charging that eliminates the need to swap batteries at shift changes, all while delivering outstanding performance, lower costs, and no daily maintenance, plus:

- Savings on your energy bills, more uptime, and reduced infrastructure costs
- Fast lifting and travel speeds at all levels of discharge and reduced component wear for longer equipment life

DUAL DRIVE MOTOR & AUTO PARKING SYSTEM

The powerful and efficient dual drive motors deliver superior throughput with faster speeds. The electric disk brakes provide sure stopping power and parking for the truck. The park brake is automatically engaged when the pedal is released, and the brake assembly requires no maintenance. The system is paired with an advanced, high efficiency, virtually noiseless ZAPI controller

ERGONOMICALLY FOCUSED OPERATOR COMPARTMENT

The spacious operator compartment is designed to minimize fatigue and stress on the operator, while maximizing comfort, control, and visibility. To maximize productivity, the cabin includes a joystick lever that requires minimal effort while delivering precise handling. Other features include an adjustable armrest, large backrest, strong overhead guard, and a non-slip floor mat.

SIMPLIFIED MAINTENANCE FOR MORE UPTIME

The BCS-9 has been designed to minimize downtime and make routine servicing fast and easy. Key components have been placed for clear visibility and ready access. A side battery removal assembly allows easy battery replacement when needed. There are remote grease fittings, an accessible top-mounted hydraulic tank filter, and a quick battery disconnect, all to cut servicing time.

The BCS-9 brings you even more advantages.

- Curve Controller System limits travel speed based on the turning radius, reducing speed for a smooth, precise turn
- The controllers are waterproof and sealed from dust to safeguard the machine and reduce possible downtime
- Optional auto-tilt leveling stops forks at a position parallel to the ground enhancing safety and efficiency when loading and unloading pallets from racks at high elevations
- Excellent gradeability and stability thanks to the powerful dual drive motors
- Hill Assist Control prevents the machine from rolling back after coming to a stop on inclines or declines
- Generous storage space including a cup holder, console box and extra compartment
- For greater convenience, the BCS-9 also features a 12V power socket and a set of accessory switches

ONLY HYUNDAI OFFERS YOU SUCH A COMPREHENSIVE, FULLY INTEGRATED TELEMATICS SYSTEM.

HiMATE

Hi-Mate works by collecting key data from sensors mounted to your equipment that track operation of the forklift, relaying that information to your computer or mobile device in real time. By monitoring key components, such as the engine, electric system, and hydraulics, Hi-Mate can help you evaluate machine and operator performance, create preventive maintenance programs, and help you minimize downtime as you maximize productivity.

Equipment operation management

Real-time monitoring and follow-up management of individual pieces of equipment or equipment fleet deliver essential operational status and information, including:

- Key-on time, travel hours, work hours, and GPS location

Equipment status management

Vital diagnostic and maintenance data is relayed as alerts, while Hi-Mate Premium provides tracking of pre-shift checklists to help reduce downtime and ensure OSHA compliance:

- Alerts are sent for DTCs, system warning, and required maintenance

Safe traveling control

An impact monitor provides alerts, accountability, and follow-up management of safety incidents involving equipment during operation:

- The system logs the number and severity of impacts as well as the operator who was logged into the unit at the time of the incident

Human resource management

Hi-Mate Premium can control who operates equipment via a pin pad and RFID reader:

- Provided information can be used to evaluate productivity, efficiency, and workforce safety
- Tracking the weight load indicator captures operator productivity

HI-MATE MANAGEMENT SYSTEM

Hi-Mate is one of the industry's most advanced remote management system. With continuous data collection, Hi-Mate delivers more communication, control, and ability to track, monitor, maintain, and manage your forklift fleet. It is the proven way to efficiently coordinate both your equipment and human resources.
